

## Ideation Phase

### Define the Problem Statements

|               |                                                |
|---------------|------------------------------------------------|
| Date          | 29 September 2026                              |
| Team ID       | SWTID-2026-4375                                |
| Project Name  | Implement Client Script & UI Policy (Incident) |
| Maximum Marks | 2 Marks                                        |

#### Customer Problem Statements

| Problem Statement (PS) | I am (Customer)                                                        | I'm trying to                                                                                      | But                                                                                                                      | Because                                                                                                                                      | Which makes me feel                                                            |
|------------------------|------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------|
| PS-1                   | A service desk agent who logs and triages incidents in ServiceNow      | Create high-impact incidents that are complete, correctly prioritized and routed to the right team | Assignment group, Assigned To and Urgency are often missed or set inconsistently, and incomplete records still get saved | The Incident form relies on manual awareness and has no client-side rules to enforce mandatory fields or auto-set values when Impact is High | Frustrated and anxious about rework, delayed routing and SLA breaches          |
| PS-2                   | An incident manager responsible for SLA compliance and service quality | Trust incident data for reporting, routing and SLA tracking                                        | Records arrive incomplete or inconsistent, and State can be changed straight from the list view without any form checks  | There are no UI Policies or Client Scripts to validate data at save time or to control edits made in the list                                | Concerned and unsure about report accuracy, and pressured when SLAs are missed |

#### PS-1 - Customer view

|                            |                   |                                                                                                                                              |
|----------------------------|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------|
| <b>I am</b>                | <i>Who?</i>       | A service desk agent who logs and triages incidents in ServiceNow                                                                            |
| <b>I'm trying to</b>       | <i>Goal</i>       | Create high-impact incidents that are complete, correctly prioritized and routed to the right team                                           |
| <b>but</b>                 | <i>Barrier</i>    | Assignment group, Assigned To and Urgency are often missed or set inconsistently, and incomplete records still get saved                     |
| <b>because</b>             | <i>Root cause</i> | The Incident form relies on manual awareness and has no client-side rules to enforce mandatory fields or auto-set values when Impact is High |
| <b>which makes me feel</b> | <i>Emotion</i>    | Frustrated and anxious about rework, delayed routing and SLA breaches                                                                        |

## PS-2 - Customer view

|                            |                   |                                                                                                                         |
|----------------------------|-------------------|-------------------------------------------------------------------------------------------------------------------------|
| <b>I am</b>                | <i>Who?</i>       | An incident manager responsible for SLA compliance and service quality                                                  |
| <b>I'm trying to</b>       | <i>Goal</i>       | Trust incident data for reporting, routing and SLA tracking                                                             |
| <b>but</b>                 | <i>Barrier</i>    | Records arrive incomplete or inconsistent, and State can be changed straight from the list view without any form checks |
| <b>because</b>             | <i>Root cause</i> | There are no UI Policies or Client Scripts to validate data at save time or to control edits made in the list           |
| <b>which makes me feel</b> | <i>Emotion</i>    | Concerned and unsure about report accuracy, and pressured when SLAs are missed                                          |
