| Date          | 1 October 2026                                 |
| Team ID       | SWTID-2026-4375                                |
| Project Name  | Implement Client Script & UI Policy (Incident) |
| Maximum Marks |                                                |

### Model Performance Testing:

Project team shall fill the following information in model performance testing template.

| S.No. | Parameter                             | Values                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Screenshot                                                                                                                                                                                   |
|-------|---------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1.    | Model Summary                         | <p>Rule-based ServiceNow configuration on the Incident table: UI Policy "High Impact Control" (Assignment group mandatory, Urgency read-only, Reverse if false) plus three Client Scripts (onChange, onSubmit, onCellEdit). No trained model is used; behaviour was verified through functional test cases.</p> <p><b>Note:</b> If the Impact is High and Assigned to is filled in correctly, the record is saved; otherwise the save is blocked with an error message.</p> |  <p>High Impact Control UI Policy with its two actions</p>                                                 |
| 2.    | Accuracy                              | <p>Training Accuracy – Not applicable (no trained model).<br/>Validation Accuracy – Not applicable.<br/><b>Functional test result:</b> All 5 functional test cases (TC-01 to TC-05) passed: 5 of 5 = 100% pass rate.</p>                                                                                                                                                                                                                                                    |  <p>TC-01: save blocked, error under Assigned to</p> <p>TC-02: save succeeds with Assigned to filled</p> |
| 3.    | Confidence Score (Only Yolo Projects) | <p>Not applicable – this is not a YOLO / object-detection project.<br/>Rule outcome: error shown when Impact is High and Assigned to is empty; no error once Assigned to is filled.</p>                                                                                                                                                                                                                                                                                     |  <p>TC-04: State edit from list blocked with alert</p>                                                   |
